# Sustainability

As the U.S. operation of the renowned Iris Ceramica Group, We are is deeply rooted in a legacy of sustainability. Our journey begins with the visionary founder, Romano Minozzi, who coined the term "Economy = Ecology" in the 1960s. This powerful concept encapsulates his vision of an economy that serves both humanity and the environment we inhabit.

Inheriting this profound philosophy, we have always had sustainability woven into our DNA. Our commitment extends beyond mere words; it is reflected in every aspect of our business.

We continuously works to create a higher environmental standard, striving to lower its carbon footprint and provide customers with the most ecofriendly porcelain product on the market.

To reduce energy, water, and waste, we introduced an innovative formula that utilizes mostly raw materials found in the U.S., with a vast majority being sourced within 250 miles from our manufacturing plant in Crossville, TN. This produces a greener generation of products that is American made.

Our state-of-the-art manufacturing facility also operates with sustainability at its core. Key practices include a nearly closed-loop process, where raw materials and water waste are efficiently recycled back into production. Additionally, our facilities exceed legal requirements, incorporating antipollution devices such as smoke and sand depurators, water purifiers, and reutilization of heat from kilns and production losses. The plant also utilizes eco-conscious packaging and has received accolades from rigorous certifications such as DECLARE, ISO 9001, LEED, EPD, GREEN GOLD, and GREEN SQUARED.

Our commitment to the environment resonates through every solution we create. We firmly believe that sustainable practices not only benefit our planet but also enrich the lives of those who choose our products.

## The collection

Discover beauty of a dastic rock composed of delicate fragments represented in this new US-made collection. Klavall offers five natural colors ranging from a soft white to deep grey shade with illusion of clastic rocks formed from the cementation of these uniquely shaped fragments. Bring some Mediterranean flair to elevate your architectural space.

The Honed+ finish is distinctly rich to the touch and non-reflective, creating an exceptionally natural result. Its unique resistance to chemicals and stains combined with an impressive DCOF value balances ease of maintenance with slip resistance, and renders it perfect for both indoor and outdoor applications.
